ABOUT ME

I am a 4th-year Computer Engineering student eager to gain hands-on tech experience by leveraging my foundation in Java and modern web technologies. I am passionate about exploring how emerging tools can be applied in real-world scenarios, particularly in building efficient, user-centric solutions and collaborating with different teams. As a fresher, I am actively seeking opportunities to contribute, grow, and gain practical exposure to the dynamic world of technology.

SKILLS

Languages:	Core Java, C, C++, JavaScript (ES6+), HTML5, CSS3
Frameworks & Libraries:	React JS, Node JS, Express JS
Databases & Tools:	PostgreSQL, Git & Version Control

AWARDS & CERTIFICATIONS

- **Elite + Gold Rank** - 'Programming in Java course By Debasis Samanta (IIT KGP)', NPTEL
- **Professional Certification** – Cross Platform Web Development using HCL VoltMX , HCL Technologies
- **Technical Certifications** – Core Java, C, C++ Programming, Full-Stack Development (**PERN Stack**).

PROJECTS

1) PulsePM — AI-Powered Full-Stack Project Management Platform

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, Google Gemini API(Conversational Workspace Assistant), Git, PM2 on Ubuntu (server deployment)

PulsePM is a robust, **full-stack AI-assisted project management platform** used to streamline team coordination and cross-project governance . The system features secure multi-tenant workspace isolation for every project under project manager to eliminate data leakage between projects and project managers. PulsePM natively operates on Agile and Scrum workflows by integrating task-driven delivery, sprint analytics, cross-functional team management, and AI-powered blocker and risk identification, paired with real-time analytics dashboards for tracking critical KPIs like overdue tasks, blockers, task density, and team resource allocation to support fast-paced, iterative project tracking.

2) Science Blog Development ('Alloy and Orbit')

Tech Stack: EJS , CSS3 , Node.js, Express.js, PostgreSQL, Git, Axios, Bcrypt, Bootstrap 5

Engineered a responsive, full-stack educational web application utilizing Node.js, Express.js, PostgreSQL, and EJS to deliver curated scientific literature, astrophysics data, and engineering simulations. Integrated third-party REST APIs (NASA APOD API and NewsAPI) to fetch real-time astronomy telemetry and global science news.

Implemented secure user authentication and session persistence using Bcrypt password hashing and Express Session with custom route-guarding middleware. Developed interactive client-side modules with Vanilla JavaScript, including an atmospheric re-entry thermal shield simulator, dynamic quantum learning roadmaps, and embedded 3D NASA Eyes visualizations.

EXPERIENCE

Application Development Intern | Web Beta Solutions Pvt. Ltd. *July 2026 – Present*

Participating in the end-to-end software development lifecycle (SDLC) to understand how production-grade applications are architected, developed, and deployed.

EDUCATION

Bachelor of Engineering (B.E.): Computer Engineering
Cummins College of Engineering for Women - Nagpur | Expected 07/2027

Higher Secondary Education (12th Grade)
Tip Top Convent and Higher Secondary School - Nagpur

Secondary Education (10th Grade)
R.S. Mundle English School & Junior College - Nagpur

Claimed NCC **'A' Certificate**

EXTRACURRICULAR ACTIVITIES & ACHIEVEMENTS

- Secured 3rd position in university-level cricket matches.
- Earned 2nd position in a team event for cricket matches organized by **MKSSS, Pune.**

INTERESTS

Music, Adventurous Sports, Nature & Exploration, Space & Universe, Green Computing
